

Placement Cell AI Use Policy

Aditya University — Placement Cell

Purpose

This policy defines acceptable and prohibited uses of AI tools in placement preparation and recruitment-related activities. The objective is to support responsible AI use while preventing academic or professional misrepresentation.

AI Scenario Classification (EU AI Act Risk Tiers)

Scenario	Tier	Reasoning
AI résumé editing	Limited	Allowed with disclosure because the achievements remain the student's own.
AI mock interviews	Minimal	Practice use does not unfairly impact recruiters or evaluations.
AI-written placement essays	High-risk	Essays reflect communication ability and require mentor review.
AI-generated GitHub portfolio code	High-risk	Allowed only with oral defence of code understanding.
AI in graded internal assignments	Limited / Unacceptable	
AI-generated CGPA or marks	Unacceptable	Academic record falsification is strictly prohibited.
AI-cloned voice for interviews	Unacceptable	Identity fabrication misleads recruiters and institutions.
AI skill self-assessment	Minimal	Safe for reflection and placement preparation planning.

Allowed with declaration for learning tasks; banned where independent skill is assessed.

Permitted Uses

- AI may be used to improve résumé grammar, formatting, and clarity.
- AI may be used for mock interview practice and communication rehearsal.
- AI may be used to explain technical concepts for placement preparation.
- AI may be used to generate study schedules and preparation plans.
- AI may be used to review student-written code and suggest improvements.
- AI may be used to create company-preparation summaries verified with official sources.
- AI may be used for aptitude-question practice and learning support.

Prohibited Uses

- AI may NOT be used to fabricate projects, internships, certifications, or experience not actually completed. **Detection method:** Oral project defence and mentor verification.
- AI may NOT be used to alter CGPA, marks, transcripts, or academic records. **Detection method:** Cross-check with university academic portal.
- AI may NOT be used to clone voices or identities during placement interviews. **Detection method:** Recruiter live verification and continuity checks.
- AI may NOT be used to fully generate essays or statements where personal communication ability is being assessed. **Detection method:** Comparison with previous student writing samples and mentor review.

Enforcement

The placement cell may conduct random oral defences for portfolios, résumés, and technical projects submitted during placement activities. Violations of prohibited uses may result in written warnings, mandatory re-evaluation, or temporary suspension from placement support activities. The placement cell acknowledges that not all AI misuse can be detected and therefore relies partly on student integrity and professional ethics.
